## **SUMMARY**

### **TEACHING- LEARNING AND EVALUATION**

### **JOURNAL CLUB, PROGRESS OF RESEARCH WORK, M PHARM DISSERTATION, DISCUSSION / PRESENTATION (PROPOSAL PRESENTATION)**

Modern education systems emphasize not just the dissemination of knowledge but also the active involvement of students in their learning process. One effective way to achieve this is through participative learning methodologies like Journal Club, Progress of Research Work, M PHARM Dissertation, Discussion / Presentation (Proposal Presentation).

1. **Journal Club:** A Journal Club is a platform where students collectively review and critically analyze research and review articles. Through this method, students enhance their reading, analytical, and presentation skills. They learn to dissect complex scientific papers and engage in meaningful discussions that promote deeper understanding of the subject matter. This approach encourages active participation, develops critical thinking, and fosters a culture of academic curiosity.
2. **Progress of Research Work Sessions:** Progress of Research Work sessions provide students with the opportunity to present their ongoing research projects to their peers and departmental faculty members. By sharing their progress, challenges, and findings, students receive constructive feedback and insights that contribute to the refinement of their research. This methodology cultivates effective communication skills, helps students refine their research methodologies, and exposes them to diverse perspectives that enrich their own work.
3. **M Pharm Dissertation:** The M Pharm Dissertation is a cornerstone of postgraduate education, allowing students to explore a specific area of pharmaceutical sciences in depth. This process encourages students to independently conduct research, manage their time, and develop critical problem-solving skills. The dissertation promotes self-directed learning and provides students with a sense of ownership over their academic journey, fostering a deep connection to their chosen field.

## **CRITERIA: 2**

### **SUMMARY**

## **TEACHING- LEARNING AND EVALUATION**

4. **Discussion / Presentation (Proposal Presentation):** Engaging in discussions and proposal presentations enables students to articulate their ideas clearly and defend their research proposals in a public forum. This methodology not only builds confidence but also strengthens students' ability to respond to questions and critiques. Peer interactions during these sessions expose students to diverse viewpoints, fostering a collaborative and inclusive learning environment.

Participative learning methodologies like Journal Clubs, Progress of Research Work sessions, M Pharm Dissertations, and Proposal Presentation Discussions are powerful tools that transform students into active learners and researchers. These methods create an environment that promotes critical thinking, effective communication, collaboration, and self-directed learning, setting the stage for lifelong learning and success in the field of pharmaceutical sciences.
