**Syllabus for Practice School**  
**Academic Year 2022-23**  
**Semester VII (B Pharmacy)**

**Students Notice**

Date: 04/07/2022

In the VII semester, every candidate shall undergo practice school for a period of 150 hours evenly distributed throughout the semester. The student should attend practice school under each domain as declared by the program committee from time to time. At the end of the semester, every student shall submit a **handwritten report** in file provided from the store on the practice school he/she attended (not more than 40 pages).

Along with the exams of semester VII, the report submitted by the student, knowledge and skills acquired by the student through practice school shall be evaluated by the subject experts and grade point shall be awarded.

**Course of study for semester VII for Practice School**

**Options for Practice School:**

- 1) Prepare different modules in accordance with the subject domains and each student in groups must complete each of the modules.
  - Divide students in 5 Teams (15 stud in each) – 12-15 modules (from the domains like: Pharma Chemistry, Pharmacognosy, Pharmaceutics, pharmacology, QA QC, artificial intelligence).
  - Weekly each teams will visit respective 4 modules.
- 2) Allot the students in groups to individual faculty and complete the project. These projects could be screened at institute level and eligible groups would be sent for Avishkar competition.
  - The students have to report the teacher every day.
- 3) Hands on experience on the instruments / equipment which are of importance in the industry. (HPLC, FT-IR, Dissolution, Diffusion, DSC, zeta sizer, Brookfield Texture Analyzer, Extruder and Spheronizer, Freeze Dryer).

**Rules:**

- 1) No repetition of regular experiments.
- 2) The students would submit the report of each module duly signed in the end of semester.

**PO: Practice School**

Student should be able to

CO:1 Meet the rapidly changing needs and challenges of a professional workplace

CO:2 Enable students to acquire learning by applying the knowledge and skills they possess, in unfamiliar, open-ended real-life situations

CO:3 Creates the required setting for experiential and cooperative learning and education, by providing students with an opportunity to work on relevant assignments, under the guidance of professional experts and under the supervision of faculty

CO:4 Serves as a platform that facilitates and promotes partnership and intellectual exchange between academia and industry.

**PO: Project report:**

Students should be able to

CO1: demonstrate a sound technical knowledge of their selected project topic.

CO2: undertake problem identification, formulation, and solution.

CO3: design solutions to complex problems utilising a systems approach.

CO4: conduct pharmaceutical project.

CO5: communicate with engineers and the community at large in written an oral form.
