SHIRPUR EDUCATION SOCIETY

President : Shri Amrishbhai R. Patel M.L.A.

Principal : Dr. S. B. Bari M.Pharm. Ph.D., D.I.M.F.J.C.

## SUMMARY

### **CRITERIA: 2**

## **TEACHING- LEARNING AND EVALUATION**

Key Indicator: 2.3	Teaching- Learning Process
	Student centric methods, such as experiential learning,
<b>Metric No : 2.3.1</b>	participative learning and problem solving methodologies
	are used for enhancing.

Principal : Dr. S. B. Bari M.Pharm. Ph.D., D.I.M.F.J.C.

#### **CRITERIA: 2**

#### **TEACHING- LEARNING AND EVALUATION**

#### **Preamble:**

The institute's approach to teaching and learning has changed from a typical classroom setting to one that is student-centric. To improve students' learning experiences and promote self-directed learning, instructional strategies like interactive learning, participatory or collaborative learning, experiential learning, problem-based learning, and blended learning are used. The activities outside of the curriculum are created to fill in any gaps in the curriculum based on feedback from the IQAC and industry experts.

#### **Experiential Learning:**

Following activities are conducted by the institute which gives students opportunity to learn through experience and discover the opportunities in the field.

**Hands on learning (content beyond syllabus)** - Hands on learning with content beyond syllabus were organised by institute to promote active engagement and practical application of knowledge and skills. Through hands-on activities, students are encouraged to actively participate in the learning process, leading to a deeper understanding and retention of the subject matter.

**Project based learning (Final year project, practice school) -** As per the part of B. Pharm Curriculum project based learning activity conducted by institute for Final year B. Pharm Students in the form of practice school to to foster active learning, develop critical thinking and problem-solving skills, promote collaboration and teamwork, and enhance the application of knowledge in real-world contexts.

**Industrial training -** T.Y. B. Pharm students have the opportunity to participate in industrial training as part of their programme. As part of the B. Pharm. programme, students participating in industrial training gain knowledge of how various departments in the industry function as well as exposure to challenges faced by professionals in the field when manufacturing and analysing medicines and how to resolve these challenges. As part of the M. Pharm. curriculum, some M. Pharm. students are also sent to various pharmaceutical businesses for industrial training while working on their dissertations in the final semester.

## SUMMARY

Principal : Dr. S. B. Bari M.Pharm. Ph.D., D.I.M.F.J.C.

#### **CRITERIA: 2**

#### **TEACHING- LEARNING AND EVALUATION**

**Field visit (Industrial Tour) -** With the aims to provide students with practical exposure to the real-world pharmaceutical industry, enabling them to bridge the gap between theoretical knowledge gained in the classroom and its practical application to familiarize students with various aspects of pharmaceutical manufacturing processes, quality control measures, and regulatory compliance, enhancing their understanding of industry standards and practices the institute were organised Industrial Tour for the sudents.

Add on courses – Add on courses were conducted by institute to supplement and enhance the existing knowledge and skills of students, provide specialized training in specific areas, and increase their employability prospects. These courses aim to offer students additional learning opportunities beyond their core curriculum.

## SUMMARY

Principal : Dr. S. B. Bari M.Pharm. Ph.D., D.I.M.F.J.C.

SUMMARY

#### **CRITERIA: 2**

#### **TEACHING- LEARNING AND EVALUATION**

#### **Participative learning:**

Participative learning in the institute is a team process where small group of students with different learning abilities collaborate and interact.

**Avishkar** - To foster young researchers that are intended to contribute societal needs while undertaking their under-graduation, post-graduation and research studies. To encourage original and novel thinking students were participated in Avishkar which organised by KBCNMU for university level, state level which organised by hosted university of Maharashtra and Anvention level.

**Webinar** / **seminar** – Institute were organised webinars, seminars and guest lecture of industrial resource persons, renowned academicians and specific subject expert for studens to find mentors who inspire them and with the way among many to inspire young learners about the current trends and future opportunities and what it takes to become a successful career professional. These lectures help students gain real world exposure through the experts from industries and Pharma field.

**Awareness program** - Awareness programmes were organised by institutions. provide them with valuable knowledge, cultivate critical thinking skills, promote personal growth, and inspire proactive engagement in societal issues. Such programs aim to raise awareness about the swachata – Cleanliness, blood group detection, blood donation, yuvatisabha, tobacco awareness program and celebration of variouls constitutional days like Constitution day, AIDS day, Voter day, Vachan Prerna day etc.

**Journal Club** – Activity under journal club for personality development and updating of knowledge: Under protagoniost club various activities related to personality development, interpersonal skills and communication skills are conducted under Journal club for M. Pharm students.

**Seminar presentation / research progress presentation / Journal Club** - Activity seminar presentation / research progress presentation for personality development and updating of knowledge: Under protagoniost of seminars and presentation various activities related to

## HANDS ON LEARNING

The series of hands-on learning activities provided students with a comprehensive and immersive learning experience across a spectrum of scientific concepts. The calibration of UV-Visible spectrophotometers offered a practical understanding of the crucial process of ensuring accurate measurements in analytical chemistry. In addition, preparation of antiinflammatory iodine ointment, and techniques such as spheronization and pelletization in tablet manufacturing. Adjusting lighting for microscopes and conducting experiments on pelletization were also covered. Additionally, students were provided with a practical demonstration of using freely available online software to draw chemical structures. These activities collectively offered insights into analytical instrument calibration, pharmaceutical formulation, manufacturing processes, microscopy techniques, and digital tools for chemical representation, equipping participants with valuable skills applicable across scientific disciplines. Overall, these activities transcended theoretical learning, enabling students to bridge the gap between concepts and applications. The multidisciplinary nature of the activities equipped them with a versatile skill set, nurturing a holistic approach to scientific exploration and innovation.

## Criteria 2 Teaching Learning and Evaluation: 1.1 Hands-on learning

9/11/22 Date : Expt.No. 14 Aim -> To perform calibration of UV. Visible 0 0 Reference -> Indian pharmacopoela, 2007, volume -I Government of India, Ministary of Health 4 Family welfare, published by Indian pharmacopoei'a commission, Gaziabad, page no-110-112 Requirements-0 Apparatus - volumetric Flask, Beaker, pipette, Funnel. chemicals -- potassium dichormate, 0.005 M sulphuric acid, potassium chioride, towere, Hexane, Methanol. etc. ponciple -> 0 the phasmacopoeal monograph usually on standard values in order to calculate concentration (1º10 cm) OF dougs in extracts from Formulations in order to use standard values or instalment used to make measurement must be properly caliborated with prespect to it's wavelength absorption scale. In addition checks. For light & spectoral resolution are rown. these due now often pullt but o softmare Checks OF U.V. CENSHOUMENH, SO tHUE PASHOUMENE good property prochie requirement meets Page No. 50 H.R Patel Institute of Pharmaceutical Education & Research hipur Dist.Dhule(M.S) 425 40: 10

Date : Expt.No. \* proceduse -> (ontro) of absorbance, using suftable filter (or) D Solution OF patassium dichromic UV at the Wavelength indicated, Which gives For each Wavelength the exact values & permitted limit OF the Specific absorbance is ± 0.01 use Solution of potassium dichromate. UV which has been previously dried to constant weight at 130°, For controls absorbance at 235 nm, 257 nm, 313 nm, 350 nm, dissolve 570-630 mg potassium dicharamate un in 0.005 m sulphusic acid 2 dilute +0 1000 0 ml with same acid For control or absorbance at 430nm dissolve 570-630 mg potassium dichromate UV in 0.00g m sulphuric octd & dilute to 100.0 mi with some acid calculate value or A (1º1. 1cm) For Each Wavelength. A (10/0 cm) = Absorbance × 10,000 | weight OF potassium dichromote limit of storay light -> 2] Storay light may be at given (wavelength) with salitable Filter or solution for example the absorbance of 1.2.1. wh SOLUHON OF POLASSIUM dichoomate in Icm p greater than 2.0 at cell should bp about 200 nm when compaised with OFFICE ) Page No. 5 Patel Institute of Pharmaceutica ucation & Research 11

Date : Expt.No. with water as repeance liquid. (<u>pesolution power</u>) when stated in monograph, record spectrum OF 0.02 percent UU SDIUHON OF toluene in ketone un the cratio of absorbance at maximum ot about 269 nm to that at maximum at about 266 nm is not less than . is unless otherwise. in monograph. <u>perivative spectoroscopy</u> <u>Pesolution</u> when stated in monograph, <u>accord</u> the second order degrative spectorum in arange 255 nm to 275 nm OF 0.0201. Ju 4 Solution OF toluene & in methano) USING REFERENCE CELL. A Small negative extremum (or through, located between two large negative extrema (or throughts) at apour 201 nm & 208 nm should be clearly visible. Notice

Subject/Agenda: Regarding conduction of lecture on 'Content Beyond Syllabus (Gap)' Class: T.Y. B. Pharm (Division B)

All students of Third Year B. Pharm (Division B) hereby informed that your lecture is planned under the "Content beyond syllabus" scheme with below mentioned topic (gap). The lecture will be conducted with same regular schedule. Date: **02 & 03-Sept-2022.** 

**Topic/Title:** Significance of Spheronization and palletization in Tablet/Capsule manufacturing

Subject Teacher Mr. Rahul S. Tade

PRINCIPAL H. R. Patel Institute of Pharmaceutical Education & Research, Stepur Dist Dhute (M.S.) 425 405. Dr. Sanjaykumar B. Bari

Date: 91919 Aim-Preparation granules by Extrusion-spheronization technique (Demonstration) Extrusion / spheronization Extrusion spherionization is a mutiple step Process capable of mixing uniformly mixed sized Particles. The process is now being widely utt Willized in the pharmacetical industry. As pharmacetical dosage form pellets are defined as Small free Flowing, spherical or semispherical units mode up of fine powder or granules of bulk drug and exicipient by Variety of process expusion and spheronization being being one. It is primorily used a method to produce multiparticute for internedicite and controlled release application the major advantage. over the producing drug on exastively large particle Appli cation Two or more active can easily be combined in any reatio in the same unit these combination product con contain active that are incomple or having varying relase profile sphere can be used as method to limit drug migration physical characteristic of the active S OFFICE Page No. 2 ( SEAL PRINCIPAL Patel Institute of Pharmaceutical

Principal : Dr. S. B. Bari M.Pharm. Ph.D., D.I.M.F.J.C.

## SUMMARY

#### **CRITERIA: 2**

### **TEACHING- LEARNING AND EVALUATION**

Key Indicator: 2.3	Teaching- Learning Process
	Student centric methods, such as experiential learning,
<b>Metric No : 2.3.1</b>	participative learning and problem solving methodologies
	are used for enhancing.

# HANDS ON LEARNING - 2019 - 20

313/2 Date : Expt.No. Aim-Preparation granules by Extrusion-spheronization technique (Demonstration) Extrusion / spheronization Extrusion spherionization is a mutiple step process capable of mixing uniforming mixed sized Particles. The process is now being widely with Willized in the pharmacetical industry. As pharmacetical dosage form peuets are defined as Small free Flowing, spherical or semispherical units mode up of fine pounder or granules of bulk drug and exicipient by Variety of process expusion and spheronization being being one. It is primarily used a method to produce Multipasticute for Impenedicute and controlled release application the major advantage. over the producing drug on exasively large particle Appli cation Two or more active can easily be combined in any reatio in the same unit these combination product con contain active that are incomple or having verying relase profile sphere can be used as method to limit drug migration physical Characteristic Of the active OFFICE Page No. 2 (

Date: Expt.No. Ingredient and excipient can be modified 10 improve physical properties and down Stream Processing product produced extrusion spheroization Jange from bearly & shaped spherinizatio be Can very spherical paricle having properties that different. no granulating fluid or the process condition used to produce them Microcrystalline cellubse (M(C) which deforms plasticity in the dry pounder state The deformation characteristic coupled with the Larger Size pasticle result in reduced bonding site and the production of weak compacte. (reneral process 1St material are dry mixed to achieve a homogenous powder dispersion and then wet innulated produce sufficiently plastic wet mags the totals is extruited wet god shaped particle of uniform diameter toom are charged into a spheronizer and munded off Into spherical particle, the spherical particle Ove then dried. To achieve desired moisture. content- and he. opticuly screned & Rea SPICE SEAL Page No. 22 I Institute of Pharmaceutical
