CHAPTER 7

Nanostructures used in cancer imaging

Mahesh P. More¹, Sopan S. Nangare², Pravin O. Patil² and Prashant K. Deshmukh¹

¹Department of Pharmaceutics, Dr. Rajendra Gode College of Pharmacy, Malkapur, Maharashtra, India

²Department of Pharmaceutical Chemistry, SES, H.R. Patel Institute of Pharmaceutical Education and Research, Shirpur, Maharashtra, India

7.1 Introduction

Unregulated growth of cells in any organ system, irrespective of the physical attributes of a human cellular environment, is considered cancer. Multifactorial etiology is associated with cancer like genetic exposure to tobacco, chemicals, infection, long exposure to radiation, inappropriate lifestyle, etc. Cancer is the most devastating disease, and very few patients in India can afford the treatment. Developing countries like India lack a regulated cancer care system. Worldwide 71% of deaths account for noncommunicable diseases, while India accounts for 63% of all deaths. In India, 9% of deaths are due to cancer. The systemic data collection approach has been followed and established population and hospital-based cancer registry since 1981. National Cancer Registry Programme (NCRP) was developed by the Indian Council of Medical Research (ICMR) under the National Centre for Disease Informatics and Research (NCDIR) [1].

7.1.1 Cancer statistics

The reports suggest that 13.9 lakh patients were diagnosed with cancer in 2020 and are expected to be increased by 15.7 lakh by 2025. India has heterogeneous cultures, and work and lifestyle factors are also differentiated among the population. In India, cancer of the mouth, stomach, lungs, and esophagus is the majorly diagnosed cancer in males. Cancer of the breast, cervix uteri is the leading cause of cancer in females. The rate of incidence of cancer was heterogeneous in India, with lacunas observed in treatment, infrastructure, human resources, diagnosis, clinical investigation, and improper consultation, high doses of anticancer drugs are possible reasons for increasing death rate [1,2].

The Tata Memorial Hospital registered a higher number of cases among all population based cancer registry (PBCR) (81,260), with the total number of cases registered by 2016 being 667,666. The Aizawl district reports the highest number (269.4) of cases in age-adjusted rates among males, while in females, Papum Pare district has reported about 219.8. In Arunachal Pradesh, Papum Pare district reports the highest number of cancer patients every one out of four people has been diagnosed with cancer. The rate of

About Everest's Prestigious Authors

Dr. Laxmikant R. Zawar is Associate Professor and Head-Pharmaceutics at H. R. Patel Institute of Pharmaceutical Education and Research, Shirpur. He has completed his Ph.D. from North Maharashtra University Jalgaon in 2016, master degree in Pharmaceutics in 2007 and bachelors in pharmacy (B. Pharm) in 2005 from R. C. Patel Institute of Pharmaceutical Education and Research, Shirpur (M.S.). He is an approved M. Pharm and Ph.D. Guide in Pharmaceutics at North Maharashtra University, Jalgaon.

His teaching interest include Dispensing Pharmacy, Unit Operation, Hospital Pharmacy, Pharmaceutical Biotechnology, Communication Skills and Soft Skills Development, Drug Regulatory Affairs, Biopharmaceutics and Pharmacokinetics. His primary

research interest is in the field of solubility and dissolution rate enhancement, nanoparticulate drug delivery, mucoadhesive drug delivery and transdermal drug delivery. He has guided 14 M. Pharm students, presented papers in various national and international conferences and published / reviewed several articles in journal of repute. He has delivered lectures as resource person in seminars and workshops. He has conducted programs on personality development, communication skills and soft skills development.

Dr. Prashant L. Pingale is Associate Professor and Head-Pharmaceutics at Gokhale Education Society's Sir Dr. M. S. Gosavi College of Pharmaceutical Education and Research, Nashik, Maharashtra (affiliated to Savitribai Phule Pune University, Pune).

He is a Ph.D. in Pharmaceutical Sciences from NMIMS deemed-to-be-university, Mumbai in 2014, M. Pharm (Quality Assurance) from Annamalai University in 2007 and B. Pharm from North Maharashtra University, Jalgaon in 2005.

He has 50 research and review papers to his credit in various National and International journal of repute. He is a recipient of international travel grant of various national funding agencies like DBT, DST, ICMR and CSIR to present his research work in most

reputed international conferences at Vietnam, South Africa, Japan and Spain. He is an editor of book entitled "Drug Delivery Technology: Herbal Bioenhancers in Pharmaceuticals" published by Walter de Gruyter GmbH, Germany. He has authored 5 books for B. Pharm.

He is M. Pharm and Ph.D. guide in Pharmaceutics at SPPU, Pune. He is a reviewer of many national and international journals. He is Life Member of APTI, ISTE and International Union Against Tuberculosis and Lung Diseases.

Dr. Bhushan R. Rane is Associate Professor and Head-Department of Pharmaceutics at Shri. D. D. Vispute College of Pharmacy and Research Centre, New Panvel affiliated to Mumbai University. He has over 13 years of teaching experience at UG and PG Levels. He guided more than 40 students for their PG dissertation. He has published more than 60 peer reviewed research and review articles in national and international journals. He has co-authored 5 books at National level and 8 book chapters at international level. He is a reviewer of several scientific national and international journals. He received grant worth Rs. 20 Lakhs from various apex bodies like AICTE. His research interests are focused around plan, improvement and portrayal of vesicular, microparticulate, nanoparticulate systems and advancement of different solid dosage forms for oral conveyance.

Oriented to D. & B. Pharm Students

Dr. Vikas V. Patil
Dr. Jayvadan K. Patel
Mr. Ketan B. Patil
Mr. Narendra B. Patil

MCQs Book for Pharmacy

About The Book

This book attempts to introduce a series of MCQs in Pharmacy of all subjects. Which cover important learning objectives in pharmaceuticals. MCQs method is an important tool for self-study and self-assessment. An overwhelming amount of detailed information about an ever-increasing number of drugs is now available. A mental exercise in the considerations that underlie the choice of one drug over the other in specific situations has to be practiced.

The book has 800+ MCQs which cover all the subjects related to pharmacies such as Pharmaceutics, Pharmacology, Pharmaceutical Chemistry (Inorganic, Organic, Physical, and Medicinal), Clinical Pharmacy, Pharmacognosy, Biochemistry, Pharmaceutical Analysis, Microbiology, and Pharmaceutical Jurisprudence. I hope this book will be helpful for those students who are preparing for competitive examinations in the field of Pharmaceutical Technology. I consider myself an eternal learner and a regular student of Pharmacy.

Pharmaceutical Education, for pharmacists, however, does not intervene, even when they see and understand a drug therapy problem, its causes, and its solutions. I have long suspected that one underlying cause of such inaction is a lack of confidence as if pharmacists do not appreciate their knowledge and how much they can contribute to patient welfare. If this book helps pharmacists to focus, recognize and appreciate their pharmacy knowledge, it will be a useful addition to that enterprise.

Fungal-mediated Zinc Nanoparticles and their Applications

Chandrakant V. Pardeshi,^{1,*} Swapnil N. Jain² and Nitin R. Shirsath²

Introduction

Nanotechnology has become one of the important areas in the field of modern material sciences. NPs are considered potential scientific tools which are widely used in various biotechnological and pharmacological industries. Nanoscience is the study of substances at the molecular and atomic levels. The basic component in the manufacture of nanostructures is the matter at the nanoscale of the order of $10^{-9} \text{ m} = 1 \text{ nm}$, which is one-billionth of a meter. This technology is being employed in many areas and not limited to textile industries, agriculture, food processing, sophisticated diagnostic and medicinal techniques, and drug delivery, etc. (Boroumand Moghaddam et al. 2015, Pandurangan and Kim 2015). NPs are usually utilized for the exploration, synthesis, and characterization of materials in the range of 1–100 nm (Li et al. 2011).

NPs make a part of a large group of nanomaterials, with 'nano' indicating a tiny physical unit of dimension. Hence, NPs have properties that are quantitatively or qualitatively distinct from other physical forms of the same material (Saravanan et al. 2021). The large surface area to mass ratio, resulting in an increased ratio of surface to core atoms and an increased set of corner and edge atoms is sufficient to explain the size-related modifications in particle properties. This may not only result in greater reactivity but also enhanced related physical properties, allowing new applications to be developed (Medhi et al. 2020).

ABSTRACT

Skin irritation and sensitivity evaluation is a major hurdle in current development, wherever newer formulations are come in market with differential composition and components. Each excipient or chemical must be tested for its irritant potential. Guidelines asserted by various regulating agencies, need to be considered before proceeding for test protocols. As per the current scenario adapted by regulatory authorities, the researcher selected an appropriate testing protocol like an in-vitro test methodology for determining irritant potential. Various underlying techniques are covered within this chapter to understand the methodologies used to test the irritant effect of chemicals. Researcher continuously working on simulating or

Chapter 5

Passive and Active Targeting for Solid Tumors

Mahesh P. More, Prashant K. Deshmukh, Pravin O. Patil, Sopan N. Nangare, Rahul S. Tade, Ashwini G. Patil, Abhijeet Pandey, Srinivas Mutalik, Prashant B. Patil, Zamir G. Khan, and Vivek B. Borse

5.1 Introduction

Cancer is a disease condition where abnormally mutated cells are divided in an uncontrolled way which leads to complex malignancy, if untreated (Padhi et al. 2015). The associated complexities potentially affect every organ of human body. Cancer is the most devastating disease as more than seven million deaths are reported each year. The conventional chemotherapeutic approaches are unable to provide a sufficient recovery rate due to inherent drawbacks. In addition to chemotherapy, solid tumors are also being treated using surgery or laser therapy, or a combination thereof (Thakar et al. 2021).

Conventional approaches have their own limitations in terms of side effects, dosing level, dosing interval, patient safety, etc. There is a constant need to develop an economical approach for the delivery of the drugs to the targeted sites. The current developments in nanotechnology supports better preclinical or laboratory results but did not reach to the clinical or commercial level. The nanotechnology based

Chapter 14

Polymer-Based Nanoplatfoms for Targeting Breast Cancer

Rahul Shankar Tade, Pravin Onkar Patil, Sopan Namdev Nangare, Ashwini Ghanshyam Patil, Mahesh Prabhakar More, Prashant Krishnarao Deshmuk, Zamir Gaffar Khan, Abhieet Pandey, Sai Boddu, Dilip R. Patil, Srinivas Mutalik, Arun M. Patil, Sharad Wakode, and Sanjaykumar Baburao Bari

14.1 Introduction

Breast cancer remains the utmost feared disease among women with the highest mortality rate. It impacts about 2.1 million lives each year (DeSantis et al. 2019). Researchers speculate that soon breast cancer will be the major disease of concern in the health care system. Clinicians describe or classify by staging or grading systems. The systematic classification helps to find suitable or available treatment options along with the forecasting of treatment strategies (Harwansh and Deshmukh 2020; Tade and Patil 2020). The molecular as well as histological indications

Polymeric Nanoplatfoms for the Targeted Treatment of Prostate Cancer

Sopan Namdev Nangare, Pravin Onakr Patil, Rahul Shankar Tade, Ashwini Ghanashyam Patil, Prashant Krishnarao Deshmukh, Abhijeet Pandey, Zamir Gaffar Khan, Srinivas Mutalik, Namdeo Ramhari Jadhav, Jayvadan Kantilal Patel, Mahesh Prabhakar More, and Sanjaykumar Baburao Bari

16.1 Introduction

Cancer is one of the world's principal public health problems (Fitzmaurice et al. 2015; Padhi and Behera 2020). It is the second-largest consequence of patient deaths and is accountable for seven million deaths annually (12.5% worldwide) (Orive et al. 2005; Siegel et al. 2014). Followed by cardiovascular disease, cancer in the United States is the second most frequent cause of death with a total of 1,665,540 new cancer cases and 585,720 deaths in 2014 (Siegel et al. 2014). More particularly, as per American Cancer Society evidence (2014), prostate cancer (233,000), female breast cancer (235,030), lung/bronchus cancer (224,210), colon/rectum cancer (136,830) seems to be the most common forms of cancer (Salaam et al. 2018; Siegel

ABSTRACT

Current development in the science of nutraceuticals aims to improve the benefits of functional foods, including minerals, vitamins, and other dietary supplements (DS). Nano-nutraceuticals actively participate in the safe and effective delivery of dietary bioactive. Recent trends in the delivery of nutraceuticals, including medical nutrition, phytonutrients, and nutrition via solid lipid nanoparticles (SLNs), have emerged since the last few decades with the objective of controlled and targeted delivery. SLNs witnesses promising alternatives for various colloidal drug and nutraceuticals delivery systems viz., nanoemulsion, liposomes, and polymeric nanoparticles. The biodegradable and biocompatible nature of SLNs proves itself favorable among other polymeric nanoparticles. Furthermore, SLNs ensure better therapeutics by modifying nutrients release kinetics, bio-distribution, and greater uptake in tissues. Despite the potential ability of SLNs for nutrient delivery, their manufacturing still poses a challenge. USFDA (United States

Chapter 4

Recent Updates on In Silico Screening of Natural Products as Potential Inhibitors of Enzymes of Biomedical and Pharmaceutical Importance

Mohini Patil, Samadhan Patil, Vijay L. Maheshwari, Laxmikant Zawar, and Ravindra H. Patil

Abstract Natural products from medicinal plants have been increasingly used in modern medicine due to their safety, efficacy, and lesser toxicity. World over, a large number of natural compounds are evaluated for the desired bioactivity. A wide range of phytoconstituents such as alkaloids, terpenoids, tannins, steroids, etc. have been recognized for their varying biological activities. However, obtaining the natural products with the desired bioactivity is a time-consuming and commercially difficult process. Molecular docking is used for screening known as well as novel drugs to identify novel compounds by predicting their binding mode and affinity. Moreover, in silico molecular docking can be performed to analyze their binding capabilities into the 3D structure of proteins. AutoDock and AutoDockTools are open-source techniques that have been extensively cited in the literature as essential tools in structure-based drug design. These methods are fast enough to permit the virtual screening of ligand libraries containing tens of thousands of compounds. This article highlights the recent developments in the virtual screening of enzyme inhibitors using various docking tools and their significant applications in designing potent inhibitors for the management of various metabolic and infectious diseases.

Zamir G Khan is an Assistant Professor at Department of Pharmaceutical Chemistry, H R Patel Institute of Pharmaceutical Education and Research, Shirpur Dist. Dhule, Maharashtra. He is pursuing Ph. D. in Pharmaceutical Sciences from KBC NMU Jalgaon. He received M Pharmacy degree in Pharmaceutical Chemistry in 2014 from R. C. Patel Institute of Pharmaceutical Education & Research, Shirpur (M.S.). He did his bachelor in Pharmacy (B. Pharm) in 2012 from same institute. He has received two Gold Medals in UG category in 2012 and in PG category in 2014 from North Maharashtra University, Jalgaon. He has qualified GPAT 2013 and GPAT 2014. He is life member for Association of Pharmaceutical Teachers of India (APTI) and Society of Pharmaceutical Education and Research (SPER). He has completed 10 UG projects so far. He has published 18 research papers and one review paper in national and international journals of repute. He has one book chapter published in "Nanobiosensors for Biomolecular Targeting", Publisher: Elsevier. His research specialization includes Fabrication of Fluorescent Nanomaterials for biosensing applications, analytical method development and validation as per International Council for Harmonization (ICH) guidelines, Stability indicating method development and validation as per ICH guidelines.

Prashant Bhagwan Patil is an Assistant Professor at Department of Pharmaceutical Chemistry, H R Patel Institute of Pharmaceutical Education and Research, Shirpur Dist. Dhule, Maharashtra. He is pursuing Ph. D. in Pharmaceutical Sciences from Sankalchand Patel University, Visnagar, Gujarat and pursued a Master's Degree in Pharmacy (M. Pharmacy) with specialization in Quality Assurance in 2015 from North Maharashtra University, Jalgaon Maharashtra. His area of research includes nanoformulation, microwave assisted synthesis, validation, synthesis of graphene nanomaterial as Nanobiosensors and its conjugation. To his credit, he has presented 17 papers in various referred conferences and also published over 13 publications in various referred national and international journals of repute including review articles with 1 book.

Matin Salim Shaikh is an Assistant Professor at Department of Pharmaceutical Chemistry, H R Patel Institute of Pharmaceutical Education and Research, Shirpur Dist. Dhule, Maharashtra. He pursued a Master's Degree in Pharmacy (M. Pharmacy) with specialization in Pharmaceutical Chemistry in 2020 from North Maharashtra University, Jalgaon Maharashtra. His area of research includes EGFR I's, microwave assisted synthesis, Problems associated with mutation in NSCLC. To his credit, he has 4 publications in various referred national and international journals of repute including review articles.

About the book

Description

Herbal Bioactive-Based Drug Delivery Systems: Challenges and Opportunities provides a wide-ranging, in-depth resource for herbal bioactives, including detailed discussion of standardization and regulations. The book first explores specific drug delivery systems such as gastrointestinal, ocular, pulmonary, transdermal, and vaginal and rectal. It then discusses novel applications for nano, cosmetics, nutraceuticals, wound healing and cancer treatment. Finally, there is a section focusing on standardization and regulation which includes an enhancement of properties. This book is an essential resource for pharmacologists, pharmaceutical scientists, material scientists, botanists, and all those interested in natural products and drug delivery systems developments.

14.1 Introduction

All over the world natural products from herbal origin and traditional systems of medication have been a trend for centuries. Indian system of medicine (Ayurveda, 3000 years old system) Babylon, Greek, and Roman systems furnish instructions for the preparation, formulation, and administration of the herbal medicines. According to one of the estimates, modern scientific investigation increases the awareness amongst world population for the use of natural products for primary healthcare needs (Farzaneh & Carvalho, 2015; Joana Gil-Chávez et al., 2013). Bioactive agents such as anthocyanins, flavonoids, alkaloids, phenolics, stilbenes, polysaccharides, essential oils, water-soluble vitamins and fats, have garnered attention as bioactive agents in management of various dangerous diseases (Ramawat, Dass, & Mathur, 2009). The toxic effects of synthetic drugs and their less availability for many chronic diseases has led to emergence of use of bioactive herbal constituents (Eisenberg et al., 1993; MacLennan, Wilson, & Taylor, 1996; Sawyer, Gannoni, Toogood, Antoniou, & Rice, 1994). Plant-based medicines have been used for general ailments for conditions such as hypersensitivity, carcinoma, hypertension, to dangerous diseases including cancers, diabetes, Alzheimer's diseases, and cardiovascular diseases (Andrae-Marobela, Ghislain, Okatch, & Majinda, 2013; Domian et al., 2009; Lacroix & Li-Chan, 2014; Liu et al., 2013; Zhao & Xiao, 2013; Xiao, Muzashvili, & Georgiev, 2014; Zhu et al., 2020).

All over India around ~18,000 species of flowering plants are found of which 6000–7000 are estimated to have medicinal properties. Even to minimize the financial load on governments of developed country, the World Health Organization (WHO) encourages use of herbal medicine (Ravishankar & Shukla, 2008).

Abstract

The application of nanotechnology in drug delivery is gaining much attention from researchers due to their plethora of benefits especially in the improvement of pharmacoki-

netics as compared to conventionally available dosage forms. In this line, numerous advanced approaches have been adopted that demonstrated excellent applicability in the drug delivery systems. Despite this, they are lacking the foremost limitations related to absorption, distribution, metabolism, and excretion of the drug that affect the therapeutics of the active. Noteworthy, polymeric materials

About Everest's Prestigious Authors

Dr. S. R. Tambe is a Principal at Mahatma Gandhi Vidyamandir's Pharmacy College, Panchavati, Nashik. Prof. Tambe is a well known teacher, having an experience of more than 25 years of teaching Pharmaceutical Analysis at Undergraduate as well Postgraduate level. Prof. Tambe has to his credit 4 books on Pharmacy. He has published several papers in national and international journal of repute and acted as reviewer for many of reputed journals. Prof. Tambe has authored Pharmaceutical Analysis V book with Everest Publishing House.

Dr. Dipak Patil has completed B. Pharm from Pune University and M. Pharm (Pharmaceutical Chemistry) from Nagpur University. He is awarded Doctor of Philosophy (Ph. D.) for his research work from North Maharashtra University, Jalgaon. Dr. Dipak Patil is currently working as a Head of Department of Pharmaceutical Analysis at H. R. Patel Institute of Pharmaceutical Education and Research, Shirpur. He has more than 12 years of experience in teaching Pharmaceutical Analysis to B. Pharmacy and M. Pharmacy. He had guided 18 M. Pharm projects of Quality Assurance till date. He has published more than 18 research articles in national and International journals. He has adopted innovative teaching methods like Flipped classroom, Think-Pair-Share activity in classroom along with digital content creation shared on internet through YouTube.

His area of research includes Analytical method development and validation (Spectroscopy and Chromatography), Bioanalytical Work (Pharmacokinetic study), Drug-Excipient Compatibility Study, Experimental design, Sickle cell Disease: Identification, Management and Treatment, Characterization of Synthetic/Phytochemical compounds using techniques like FT-IR, DSC, NMR, Mass Spectrometry, LC-MS, etc. He is working as a Program Co-ordinator for "Short Courses in Handling Sophisticated Analytical Instruments".

He is also working as Consultant for FT-IR, DSC, HPLC, HPTLC study and bioanalytical work. He has completed 2 Industrial Projects related to Bioanalysis.

Mrs. Anuja Bhosale is currently working as an Assistant professor in Department of Pharmaceutical Chemistry at Mahatma Gandhi Vidyamandir's Pharmacy College, Panchavati, Nashik. Her area of interest is Analytical Method Development. She has 4.5 years of teaching experience in subjects like Pharmaceutical inorganic chemistry, Pharmaceutical analysis I, II and III. She also has published paper in international journal. She is life time member of APTI.

A Review on Acacia Species of Medicinal Value

Swati P. Deshmukh

Abstract

Plants are used medicinally in different countries and are a source of many potent and powerful drugs. Various plants of Acacia species were claimed to possess traditional medicinal activities. Different parts of plant have different phytochemical constitution and different pharmacological action. Different species of Acacia have been reported, but only a few of these find medicinal importance out of which the prominent ones are *Acacia nilotica*, *Acacia polyacantha*, *Acacia leucocephala* and *Acacia farnesiana*. In light of this, the present review aims at exploring current scientific findings on the various plants of this specie. The present review mainly covers some of the important medicinal plants belonging to the *Acacia* spp. with special attention towards their various traditional uses, chemical constituents and medicinal properties.

Keyword: Acacia, scientific findings, traditional system of medicine

Introduction

The genus *Acacia* belongs to family Mimosaceae. *Acacia* Wild. is a very large genus containing trees, shrubs and climbers. It is indigenous to the Indian Sub-continent as also in Tropical Africa, Burma, Sri Lanka, Saudi, Arabia, Egypt and in West and East Sudan. In India, natural babul forests are generally found in Maharashtra, Gujarat, Andhra Pradesh, Rajasthan, Haryana and Karnataka. However, scattered trees in groups occur naturally and also widely planted in almost all states and Union territories except north-eastern states, Kashmir and Kerala [1]. It is estimated that there are roughly 1380 species of *Acacia* worldwide, about two-third of them native to Australia and rest of spread around tropical and subtropical regions of the world.

The Ayurveda system of medicine uses about 700 species, Unani 700, Siddha 600 and modern medicine around 30 species [2]. Plants are used medicinally in different countries and are a source of many potent and

11.1 Introduction

The nasal route of delivering the drug has significant historical background for achieving local effects. It was the time of early 1980s, which witnessed the emergence of nasal route as an important systemic delivery system and alternative to the conventional drug delivery routes available at that time. The oral route is one of the most promising and suited routes of administration for many drugs. But, there are some consequences like reduced bioavailability, first-pass effect, and gastric irritation, which forced the researchers to hunt for the alternative routes [1, 2].

The central nervous system (CNS) is one of the most complex systems of human body that assures the normal functioning of the human body such as of breathing, walking, talking, and thinking [3]. Nose-to-brain delivery route improves the specific targeting of drugs and dilutes the systemic side effects. The important feature of nose-to-brain delivery is that it bypasses the blood-brain barrier (BBB) and targets the drug to the brain via olfactory and trigeminal neural pathways [4, 5]. BBB is the dense network of blood vessels with tightly packed endothelial cells. BBB distinguishes the brain from circulatory system. It shields the brain from harmful substances viz. bacteria and toxins [6].

Pharmacy Practice Essentials of Hospital, Clinical and Community Pharmacy

'Pharmacy Practice: Essentials of Hospital, Clinical and Community Pharmacy' is the first ever book with complete coverage of pharmacy practice education. This book is mainly focused on the syllabus framed by Pharmacy Council of India (PCI), New Delhi, for pharmacy students of India and overseas.

It covers all the required topics in an organized way so that students and readers will find all the information related to this subject. It helps students to gain the knowledge of various functions of hospitals, patient-oriented solutions, highlights on education and training program of the pharmacist.

This is the unique book for the pharmacist to use his knowledge and skills for the healthcare of people and patients.

Main features of the book:

- The understanding of the content is simple and easy.
- Comprehensive elaboration of content of each chapter with figures and tables.
- Exercise given after each chapters which are helpful for the students of new examination pattern.
- Useful for students of D. Pharm, B. Pharm, Pharm. D., M. Pharmacy (Clinical Pharmacy).

About the Authors

Sanjaykumar B. Bari has a commendable track record of achievements and success in his academic career in Pharmacy. He is serving as Principal and Professor at H. R. Patel Institute of Pharmaceutical Education and Research, Shirpur, Dist: Dhule (M.S.). He has 23 years of long teaching experience at Anuradha College of Pharmacy, Chikhli, Dist: Buldana (M.S.), and R. C. Patel Institute of Pharmaceutical Education and Research, Shirpur.

He has completed B. Pharm. (1994) from Government College of Pharmacy, Karad; M. Pharm. in Medicinal and Pharmaceutical Chemistry (1996) from S. G. I. T. S., Indore (M.P.) and awarded Ph. D in Pharmaceutical Sciences (2006) under AICTE-QIP program from University College of Pharmaceutical Sciences, Kakatiya University, Warangal (A.P.).

He has presented several papers at National and International conferences and filed 04 patents to his credit. He has received a 'National Merit Scholarship' from XIIth to B. Pharm., Junior Research Fellowship (Gate-94-M.Pharm.), and Ph. D (AICTE-QIP Fellowship), V-life Sciences best publication Award 2012, Dr. P.D. Sethi Annual Award 2011 - A certificate of merit for a research paper, International Achievers Award 2015 by Ulkarsh and Manavseva Vikas Foundation at National Achiever's Summit, Aurangabad.

He has supervised 65 at M.Pharm. level Projects and 12 Ph. D students in Pharmacy. He has more than 160 review and research publications in various renowned national, international levels and thirteen books to his credit. He has received several national & international awards.

Currently, Dr. Bari is Chairman, Board of Studies in Pharmaceutical Chemistry, Academic Council Member, member of Research Recognition Committee at KBCNMU, Jalgaon. He is a Life member of various professional associations like ISTE, IPA, APTI, ICS, IPS. Currently, he is Co-ordinator, Faculty of Pharmacy, North Maharashtra University, Jalgaon.

Vishal C. Gurumukhi, B. Pharm, M. Pharm., (and Ph. D. registered), is currently working as Assistant Professor in Department of Quality Assurance, R C Patel Institute of Pharmaceutical Education and Research Shirpur, Maharashtra. He has 12 years of teaching experience. He is a GPAT-2016 examination qualified which was conducted by AICTE. He is an approved UG and PG teacher from Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon. He has supervised 24 M. Pharmacy level projects. He completed B. Pharm. from Agnihotri College of Pharmacy, Wardha; M. Pharm (Quality Assurance) from Sharad Pawar College of Pharmacy, Nagpur, Maharashtra. He is presently pursuing a Ph. D. (Faculty of Pharmacy) in Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon. He worked as Assistant Professor in Kasturi Shikshan Sanstha's College of Pharmacy, Pune; later worked as Assistant Professor in KYDSC's College of Pharmacy, Bhusawal. He has 8 international 3 national publications in the journal of repute. He is a reviewer of research papers for ACS Journals. Recently, he was invited to present his research work at the 10th International Colloids Conference held in Mallorca, Spain.

Pravinkumar Vishwanath Ingle, PhD, MPharm, MBA is presently working as a Senior Lecturer in the Department of Pharmacy Practice, School of Pharmacy, International Medical University (IMU), Kuala Lumpur, Malaysia. He started his career as a lecturer in 2006. He is Founder & President of Harivishwa Education Society. Dr. Pravinkumar has been contributing extensively to the world of publication and recognized internationally as an Editor in Chief for one of the reputed Pharmacy Journal - Journal of Pharmaceutical Research & Clinical Practice (JPRCP) which is published under the well-known publisher - Medknow Publications (Wolters Kluwer). He published more than 50 Research/Review/Short Papers in National & International Journals of repute. He is also participating in the curriculum designing and developing for the Pharmacy related programmes at the university level. He is recognized with Achievement Award for the successful development of new programmes - Master in Pharmacy Practice and Postgraduate Diploma in Diabetes Management and Education. He served as an Advisor, for '6th International Postgraduate Conference on Pharmaceutical Sciences (IPOPS) 2018' held at International Medical University, Kuala Lumpur, Malaysia.

Organic Name Reactions

Principles, Mechanisms and Applications

Special features of the book

We have divided every organic reaction in following subsections:

It is hope that this type of presentation will greatly aid the memory and understanding of students

Principle: Includes text and general reactions with examples. We have indicated changes in functional groups while conversion of reactants into final products with the use of advanced ChemBioDraw Ultra tool. The text of manuscript has been made simple and lucid with pictorial presentations.

Mechanism: Includes text and detailed stepwise mechanism by highlighting the changes in reactants at every step. The context includes beautiful and clear representation of mechanisms; each step is shown without using any shortcuts. Lone pairs and reaction arrows are indicated clearly by using ChemBioDraw Ultra, making the mechanism easier to follow and understand thoroughly.

Applications: Includes text and utility of particular reaction in synthesis of useful product. We have also included stereochemical aspects and orientations for reactions along with its synthetic applications, where it is necessary, in spite of refreshing the current understanding of name reactions, we have tried to incorporate latest synthetic industrial applications, so that it will help the learners who involved in synthetic research, early career researchers and at large to scientific community.

About the Authors

S. B. Bari has a commendable track record of achievements and success in his academic career in Pharmacy. He has completed B. Pharm. (1994) from Government College of Pharmacy, Karad and M. Pharm. in Medicinal and Pharmaceutical Chemistry (1996) from S. G. J. T. S., Indore (M.P.). He has been awarded Ph.D in Pharmaceutical Sciences (2008) under AICTE-QIP program from University College of Pharmaceutical Sciences, Kakatiya University, and Warangal (A.P.). He has started his teaching career from lecturer at Anuradhe College of Pharmacy, Ghankh, Dist. Bidar (M.S.). Then he worked as Assistant Professor, Professor, Vice Principal, Head of Department, Department of Pharmaceutical Chemistry, at R. C. Patal Institute of Pharmaceutical Education and Research, Shirpur. Presently he is serving as Principal and Professor at premier Institute an ISO 9001:2008 certified H. R. Patal Institute of Pharmaceutical Education and Research, Shirpur Dist. Dhule (M.S.). He has 22 years of teaching experience.

He has more than 160 review and research publications in various renowned national, international journals. He has presented several papers at national and international conferences, ten books and filed 03 patents to his credit. He has received 'National Merit Scholarship' from XI to B. Pharm., Junior Research Fellowship (Gate-BI-M Pharm.), Ph.D (AICTE-QIP Fellowship), V- life Sciences best publication Award 2012, Dr. P.D. Seltis Annual Award 2011-A certificate of merit for research paper, International Achiever Award 2015 by Utkarsh and Manavendra Vikas Foundation at National Achiever's Summit, Aurangabad.

He has supervised 85 M. Pharm. level Projects and 31 Ph. D students in Pharmacy. His Ph. D. students received several awards like El-Lily and Company Asia Outstanding Thesis (Ph.D) Award (2011), Fast Track Young Scientist (2009) DST Fellowship and Rajiv Gandhi National Fellowship (2008), UGC, New Delhi.

He is member and faculty member of BOS, Pharmaceutical chemistry at NMU, Jalgaon. He is a life member of various professional associations like ISTE, IPA, APTI, ICS, IFS. Currently he is Co-ordinator, Faculty of Pharmacy, North Maharashtra University, Jalgaon.

Vinod G. Ugale was born and raised in Bidharna. He moved to the Amravati University to study pharmaceutical science (2007) and then read pharmaceutical chemistry at Nagpur University, Maharashtra (2009). He moved to North Maharashtra University, Jalgaon, achieving a Ph.D. in pharmaceutical chemistry under the supervision of Prof. Sanjay B. Bari. In his independent research career at North Maharashtra University in mid-2012, he set out to understand the organic and medicinal chemistry of nitrogen heterocyclic compounds. Vinod G. Ugale, Ph.D, is currently an Assistant Professor at Department of Pharmaceutical Chemistry, R. C. Patal Institute of Pharmaceutical Education and Research, North Maharashtra University, Jalgaon, Maharashtra, India. He has been involved in teaching organic chemistry to undergraduate students from last few years. He has published research papers, book chapters, and reviews in various reputed journals and has presented his works at several international platforms, for which he received awards by a different bodies. He is a member of professional and scientific societies, such as American Chemical Society (ACS) and Association of Pharmaceutical Teachers of India (APTI).

About Everest's Prestigious Authors

Dr. Bhushan R. Rane is Associate Professor and Head-Department of Pharmaceutics at Shri. D. D. Vispute College of Pharmacy and Research Center, New Panvel affiliated to Mumbai University. He has over 13 years of teaching experience at UG and PG Levels. He guided more than 40 students for their PG dissertation. He has published more than 60 peer reviewed research and review articles in national and international journals. He has co-authored 5 books at National level and 8 book chapters at international level. He is a reviewer of several scientific national and international journals. He received grant worth Rs. 20 Lakhs from various apex bodies like AICTE. His research interests are focused around plan, improvement and portrayal of vesicular, microparticulate, nanoparticulate systems and advancement of different solid dosage forms for oral conveyance.

Dr. Prashant L. Pingale is Associate Professor and Head-Pharmaceutics at Gokhale Education Society's Sir Dr. M. S. Gosavi College of Pharmaceutical Education and Research, Nashik, Maharashtra (affiliated to Savitribai Phule Pune University, Pune). He is a Ph.D. in Pharmaceutical Sciences from NMIMS deemed-to-be-university, Mumbai in 2014, M. Pharm (Quality Assurance) from Annamalai University in 2007 and B. Pharm from North Maharashtra University, Jalgaon in 2005.

He has 35 research and review papers to his credit in various National and International journal of repute. He is a recipient of international travel grant of various national funding agencies like DBT, DST, ICMR and CSIR to present his research work in most reputed international conferences at Vietnam, South Africa, Japan and Spain.

He is M. Pharm and Ph.D. guide in Pharmaceutics at SPPU, Pune. He is a reviewer of many national and international journals and funding agencies like DST, New Delhi. He is Life Member of APTI, ISTE and International Union Against Tuberculosis and Lung Diseases.

Dr. Laxmikant R. Zawar is Assistant Professor and Head Pharmaceutics at H. R. Patel Institute of Pharmaceutical Education and Research, Shirpur. He has completed his Ph.D. from North Maharashtra University Jalgaon in 2016, master degree in Pharmaceutics in 2007 and bachelors in pharmacy (B. Pharm) in 2005 from R. C. Patel Institute of Pharmaceutical Education and Research, Shirpur (M.S.). He is an approved M. Pharm and Ph.D. Guide in Pharmaceutics at North Maharashtra University, Jalgaon.

His teaching interest include Dispensing Pharmacy, Unit Operation, Hospital Pharmacy, Pharmaceutical Biotechnology, Communication Skills and Soft Skills Development, Drug Regulatory Affairs, Biopharmaceutics and Pharmacokinetics. His primary research interest is in the field of solubility and dissolution rate enhancement, nanoparticulate drug delivery, mucoadhesive drug delivery and transdermal drug delivery. He has guided 14 M. Pharm students, presented papers in various national and international conferences and published / reviewed several articles in journal of repute. He has delivered lectures as resource person in seminars and workshops. He has conducted programs on personality development, communication skills and soft skills development.

A PRACTICAL BOOK OF *Pharmaceutical* **ANALYSIS**

Mr. Prashant Bhagwan Patil is an Assistant Professor at Department of Pharmaceutical Chemistry, H R Patel Institute of Pharmaceutical Education and Research, Shirpur Dist. Dhule, Maharashtra. He is pursuing Ph. D. in Pharmaceutical Sciences from Sankalchand Patel University, Visnagar, Gujarat and pursued a Master's Degree in Pharmacy (M. Pharmacy) with specialization in Quality Assurance in 2015 from North Maharashtra University, Jalgaon Maharashtra. His area of research includes nanoformulation, microwave assisted synthesis, validation, synthesis of graphene nanomaterial as nanobiosensors and its conjugation. To his credit, he has presented 17 papers in various referred conferences and also published over 13 publications in various referred national and international journals of repute including review articles.

Mr. Paresh Ashok Patil is a Head and Assistant Professor at Department of Pharmaceutics, Ahinsa Institute of Pharmacy, Dondaicha Dist. Dhule, Maharashtra. He is pursuing Ph. D. in Pharmaceutical Science from RKDF University, Bhopal. Madhya Pradesh and pursued a Master's Degree in Pharmacy (M. Pharmacy) with specialization in Quality Assurance in 2015 from North Maharashtra University, Jalgaon Maharashtra. He contributed in publishing 22 Review and Research papers in leading National and International Journals and has coauthored 04 books and contributed 01 chapters in a book published in renowned publications with pharmacy field. He is recipient of Best Teaching faculty Award of Ahinsa Institute of Pharmacy, Dondaicha.

Dr. Jayvadan Kantilal Patel is a Dean, Faculty of Pharmacy, Sankalchand Patel University, Visnagar, Gujarat. He has more than 24 years of academic and research experience, has published 235 research papers, presented 50 papers, both in India and abroad and holds one patent jointly. He has coauthored 14 books and contributed 51 chapters in a book published in USA. His papers have been cited more than 4000 times, with more than 20 papers getting more than 50 citations each. He has 33 projects worth more than Rs. 2 Crore are funded by government agencies and industries. He has guided 104 M. Pharm students and mentored 40 PhD scholars. He is already decorated with a dozen awards and prizes, both national and international. He is recipient of very prestigious APTI - Young Pharmacy Teacher Award (2014) by Association of Pharmaceutical Teachers of India and "AICTE-Visvesvaraya Best Teachers Award-2020" by All India Council for Technical Education, Government of India.

ABSTRACT

N-methyl-D-aspartate (NMDA) receptor is a subtype of ionotropic glutamate receptor. NMDA receptor plays a decisive role in significant high-level brain processes and has been involved in diverse neuropsychological conditions. NMDA receptor antagonists have exposed their clinical effectiveness in neurodegenerative diseases such as epilepsy, Alzheimer's disease, Parkinson's disease, pain, and depression. Depending on the clinical observations and insights into NMDA receptor pharmacology, novel modulatory approaches are beginning to emerge with potential therapeutic benefits. Hence, NMDA receptor is considered to be a prospective target for the treatment of neurodegenerative diseases. NMDA receptor has diverse sites where ligands can bind to provoke bioactivity in

About the Book

The book is intended for both undergraduate and postgraduate, with a view to encourage them to synthesize what they have learned in traditional courses on their way to making creative contributions in science. The authors claim that scientists already working in related fields will gain an appreciation for the vast sweep of microbial biotechnology, and that the book will be a useful source of information for the non-scientist. The book should indeed perform admirably in these roles, although its use to non-scientists is likely to be limited by the prerequisite specialist knowledge required for an understanding of the processes and approaches described. In the authors' preamble they say that they regard the book to be unique, because they make no artificial attempt to confine their discussion to a single scientific discipline.

The book examines the fundamental principles and facts that underline current practical applications of DNA, Fermentors and techniques of Biotechnology, detail study of genes and their analyses in bioinformatics describes these applications and examine future prospects for related technologies. As usual in books on biotechnology, judgments on appropriated categories of products for inclusion have been made. The reviewer considers the content to be appropriate but there are a few surprises.

Salient Features

- Text book of Pharmaceutical Biotechnology is a student friendly book which aims to simply understand the basic fundamentals of Pharmaceutical Biotechnology.
- Perfect merger of fundamentals of all the major areas of Pharmaceutical Biotechnology like Enzyme, Enzyme immobilization, Immunology, Antigen-Antibody Reaction, Monoclonal Antibodies, Recombinant DNA technology, Protoplast fusion, Gene therapy, Microbial Transformation, Industrial Biotechnology, Biomass and Bio-energy, Animal cell culture, Tissue culture, Healthcare Biotechnology, Biotechnology and Ethics.
- The new chapter describe the scientific discipline of mapping, sequencing and analyzing chromosomal genes by management and analysis of biological information of database in easiest manner for both undergraduate and postgraduate Pharmacy students.
- The text matter is simple, easy to read and remember.
- Additional tables, boxes and charts have been given to enhance the utility value of text.
- The outlines give practical based examples.

About the Authors

Dr. Vivekanand Kisan Chatap, presently working as Assistant Professor in Department of Pharmaceutics at H. R. Patel Institute of Pharmaceutical Education and Research, at Shirpur & Advisor, Hi-Tech College of Pharmacy, Chandrapur, Maharashtra. He secured First rank in M Pharm (Pharmaceutics) and was awarded Ph. D in Pharmacy from North Maharashtra University, Jalgoan.

Prof. Pawan Tiwari, Professor and Head, Department of Pharmaceutical Chemistry, is presently teaching at Shrinathji Institute of Pharmacy Nathdwara, Rajsamand (Raj). He obtained his Bachelor of Pharmacy (2006) B. R. Nahata college of Pharmacy Mandsaur (M.P.) and M.Pharm (2008) from G.R.Y. Institute of Pharmacy Khergone (M.P.)

Dr. Ashish Dixit, Professor and Head, Department of Pharmaceutical Chemistry, is presently teaching at Translam Institute of Pharmaceutical Education & Research, Meerut (U.P.). He obtained his Bachelor of Pharmacy (2001) from School of Studies of Pharmaceutical Science, Jiwaji University, Gwalior (M.P.) and M.Pharm (2005) from Lachoo memorial college of Science & Technology, Jodhpur (Rajasthan). He obtained his Doctoral degree in Pharmaceutical Science (2016) from School of Studies of Pharmaceutical Science, Jiwaji University, Gwalior (M.P.)

7.1 Introduction

In the recent years of developmental research, significant improvement has been noticed in the performance of nanomaterial-based immunobiosensors. The classic immunoassay methods are improving day by day, as well as evolving into more robust, easy, and economical methods. In comparison with sensitivity and selectivity for the specific substrate, usability is of prime importance while designing biosensors. Until now, enzyme-based sensors have had the highest usability compared with other types of similar antibody-based sensors that are developed based on substrate specificity. Specifically, young researchers are focusing on the aspects based on substrates used for biosensing, which will be discussed in subsequent sections.

Development of immunosensors for detection of biomolecules in a rapid time frame with the highest sensitivity is a challenging task. The first biosensor was described in the literature in the early 1960s. In comparison with the upgraded development in enzyme-based biosensors, antibody-based sensors are still in nascent phases. In addition, they exhibit long response times, poor selectivity, and low sensitivity (Clark and Lyons, 1962). However, there has recently been an explosive advancement of research activities and biomolecular interaction studies (Nice and Catimel, 1999; Tess and Cox, 1999; Weetall, 1999).

The term “biosensor” is often used to cover sensor devices used in order to determine the concentration of substances and other parameters of biological interest, even where they do not utilize a biological system directly. Biosensors work by combining a biological sensing element with a detector system using a transducer (Malhotra et al., 2005). Leland Clark presented the glucose sensor in 1956, and provided the first description of a biosensor, the detection of which was based on an amperometric enzyme electrode that consisted of variation in the recorded electric impulse (Clark Jr, 1987, 1988). Biosensors are
